(a) Empirical DCR Distributions
Synth → Train (μ=0.171)
Synth → Test (μ=0.184)
Real Test → Train (μ=0.166)
Probability Density
Distance to Closest Record (Hamming)
(b) Re-identification Parity Ratio
Parity ($r = 1.0$)
Median ($r = 0.923$)
Macro Ratio ($r = 0.929$)
Probability Density
DCR Ratio: $DCR(S, D_{\text{train}}) / DCR(S, D_{\text{test}})$
(c) Membership Inference ROC Curve
MIA Attacker (AUC = 0.501)
Random Guess (AUC = 0.500)
True Positive Rate (TPR)
False Positive Rate (FPR)
